# Kenan Hot — Website (kenyhot.pro)

## Kenan Hot — Client Website

**Client Type:** Individual / Professional Athlete

**Status:** Active

**Added:** 2026-03-21

**Last Updated:** 2026-04-20

---

## Client Profile

**Name:** Kenan Hot

**Age:** 21 years old

**Profession:** Professional Soccer Player

**Position:** Midfielder

**Current Team:** Austin FC II (MLS NEXT Pro)

**Previous Team:** Duke University (NCAA Division I)

**Nationality:** USA

**Social Media:**

- Twitter: [@KenanHot16](#)

**Notable Achievements:**

- All-ACC Selection (2025)
  - 8 goals + 4 assists in 2025 season
  - USA National Team player
- 

## Website

**Domain:** [kenyhot.pro](#)

**Purpose:** Professional athlete portfolio and personal brand

# Technical Stack

**Hosting:** Vercel → planned migration to Cloudflare Pages

**Framework:** Static HTML/CSS/JavaScript

**Repo:** ~/projects/kenan-hot-web

**Vercel Project:** kenan-hot-web

**Build:** Static site (no build step required)

## Domain Details

**Registrar:** Namecheap

**Registered:** 2026-03-21

**Expiry:** 2027-03-21

**DNS Provider:** Vercel DNS (ns1/ns2.vercel-dns.com)

**Current IPs:** 64.29.17.65, 216.198.79.65 (Vercel edge network)

## Site Structure

### Key Pages:

- Landing page: Bio, stats, career highlights
- Social media links
- Photo gallery

### SEO Metadata:

- Title: "Kenan Hot — Professional Midfielder"
- Description: "21-year-old midfielder for Austin FC II. Duke University All-ACC selection. 8 goals, 4 assists."
- OG Image: Profile photo (1200x630)

### Performance:

- Load time: ~127ms (Vercel edge)
  - Status:  LIVE and operational
- 

## Service History

### 2026-03-21: Initial Setup

- Domain registered at Namecheap

- DNS pointed to Vercel
- Static site deployed to kenan-hot-web project
- ⚠ **TYPO INCIDENT:** Domain entered as knyhot.pro (missing "e") in initial Vercel config
- Created duplicate project kenan-hot with phantom domain

## 2026-04-05: Domain Correction (Partial)

- Real domain kenyhot.pro added to Vercel
- DNS configured correctly
- **Issue:** Phantom domain knyhot.pro remained attached to both projects
- HTML metadata still referenced incorrect domain

## 2026-04-20: Full Cleanup

- Identified typo across all systems
- Fixed ALAI internal documentation (inventory + blueprint)
- Removed phantom domain from Vercel
- Deleted duplicate project kenan-hot
- Fixed HTML metadata references
- **Downtime:** ~35 seconds (DNS propagation during domain removal)
- **Recovery:** Immediate, site fully operational
- **Evidence folder:** /Users/makinja/system/evidence/kenyhot-vercel-cleanup/

---

## Planned Changes

### Near-term: Cloudflare Pages Migration (Task #8487)

- **Priority:** 3 (medium)
- **Timeline:** < 5 minutes technical work
- **Reason:** Cost savings (Vercel Free → CF Pages Free), unified DNS
- **Coordination:** Requires client notification for DNS change

---

## Files & Resources

**Local Repo:** ~/projects/kenan-hot-web

**Evidence Folder:** /Users/makinja/system/evidence/kenyhot-vercel-cleanup/

## Related Tasks:

- MC #8487 — Cloudflare Pages migration for kenyhot.pro

  - Project URL: <https://vercel.com/johns-projects-4b43bfa9/kenan-hot-web>
- 

# Notes

## 2026-04-20: Typo Incident Post-Mortem

### What happened:

- Domain kenyhot.pro (correct spelling) was registered at Namecheap
- During Vercel setup, domain was entered as knyhot.pro (missing "e")
- Phantom domain knyhot.pro does NOT exist in .pro registry (RDAP 404)
- Vercel accepted the typo and created DNS records for non-existent domain
- Typo propagated to inventory docs, blueprints, task descriptions

### Root cause:

- Human error during initial setup
- No RDAP validation in Vercel domain addition flow
- No automated inventory validation

### Impact:

- Wasted 2 domain slots in Vercel
- Confusing dashboard (2 projects, 2 domains for same client)
- Incorrect SEO metadata
- Internal docs had wrong domain

### Prevention:

- New rule created: DNS Inventory Verification Protocol
  - All domains MUST pass dig + RDAP verification before adding to hosting platforms
  - Rule file: /Users/makinja/system/rules/dns-inventory-verification.md
  - BookStack: Rules & Standards / DNS & Hosting
-
