- `https://app.bilko.cloud/` → HTTP 200
- `https://api.bilko.cloud/api/v1/health` → HTTP 200

Notes

- No fake eRačun/banking/OCR/email/payroll claim was introduced; public capability API still blocks provider-backed submit/send without provider evidence.
 - Deploy Gate console errors contained one expected unauthenticated `401` while checking auth redirect; no failed flows.
