

MC #900149 — Bilko landing v4 implementacija (bilko.cloud naslovna, 2026-08-23)

CEO odobrio 2026-08-23 ~01:50 ('odobreno'): hero "**Izdaj račun. Slikaj trošak. Pitaj kad zapneš.**" + trust-linija + kompletna v4 stranica.

Spec (build-ready): `~/system/evidence/900144/landing-v4-FINAL.md` (5-ekspertski panel: Dunford/Wiebe/Laja/Traynor, sinteza Saraev; tvrdnja→dokaz tablica 30 redova; ZABRANJENO checklist 0 pogodaka — nezavisna grep kontrola Johna).

Roadmap: `evidence/900144/roadmap-FINAL.md` — Uskoro stavke imaju MC taskove #900150 (eRačun prod), #900151 (HUB3), #900152 (store release).

Build put: grana OD `feat/900139-landing-v3` (nosi trial-30 SSOT), novi PR → main; PR 386 superseded. TDD: content-truth prvo crveni; kanarinci u oba smjera.

Fakt-check u kodu: `EXPENSE_CREATE PRO+` neograničeno, `EXPENSE_OCR_SCAN PREMIUM+` (`FeatureAccess.kt:101-102`) — paušalac smije slikati trošak, autofill je Biznis.

Mehanik GATE nalazi (2026-08-23 07:31Z) — obavezno za dispatch brief

1. **ŽIVI ARTEFAKT je** `apps/landing-hr/index.html` (**statični**) — `DEPLOY-MAP.md:252` (MC #105973). `app/` / `components/` Next.js poddir u istom folderu je MRTAV KOD (MC #103871/#103308) — NE implementirati tamo.
2. **Owner agent:** Frontend Builder (@frontend-builder, CodeCraft) — routing potvrđen.
3. **Nezavisni verifier obavezan** prije ready/done (user-facing): content-truth/ZABRANJENO kapija + cross-vendor pregled (ne CEO).
4. **CI-CD wrangler→bilko-cloud stage je crven 5/5 na main-u** (poznato, neautoritativno po `DEPLOY-MAP.md`) — merge ≠ živo; poslije mergea treba ručni `wrangler pages deploy` + browser dokaz.
5. **TREE PIN:** grana `feat/900153-landing-v4` OD `feat/900139-landing-v3`; build/test tvrdnje kroz `run-build.sh` (RUNNABLE PROOF), ne proza.
