

MC 900166 — Trial 30 dana usklađivanje (2026-08-24)

MC #900166 — Bilko web: trial stringovi 7?30 dana (SSOT usklađivanje)

Task: [Bilko][M][WEB] Demo banner tvrdi „7-dnevni trial" a CEO odluka + landing kažu 30 dana bez kartice — uskladiti banner s trial SSOT.

CEO odluka: 2026-08-22 (FACTS #900144) — trial je **30 dana, bez kartice**. CEO ponovo tražio popravku 2026-08-23 ~11:50 i 2026-08-24.

Stanje prije rada (verifikovano 2026-08-24, azdo/main @ 11565d1d)

- SSOT `apps/web/lib/pricing-matrix.json`: sve pojave `trial_days` = **30** ✓
- Backend `AuthService.kt:102`: `TRIAL_DAYS` env ? : **30L** ✓ (trial stvarno traje 30 dana)
- Frontend stringovi LAŽU (7-dnevni): `DemoBanner.tsx` (16, 80, 82), `DemoBannerWrapper.tsx` (97, 106), `TrialBanner.tsx` (118), `pricing/page.tsx` (577), `messages/hr.json` + `en.json` (549), `content/help/hr/registracija-i-prvi-pristup.mdx` (42); test asercije `rbac-wp3-103143.test.tsx:251` i `rbac-wp4-103144.test.tsx:102` pinuju „free 7-day trial".
- Negativna kontrola: `content/legal/dpa-hr.md:109` / `dpa-bs.md:109` „7-dnevni refresh tokeni" = AUTH, NE trial — ne dira se.

Plan

Pi-orchestrator (jedini sankcionisani editor) primjenjuje mehanički artefakt: novi

`apps/web/lib/trial.ts` (`TRIAL_DAYS` iz `pricing-matrix` SSOT), interpolacija u komponentama, literali u `i18n/mdx`, poravnanje SVIH test asercija u istom PR-u, novi truth test (`trial_days===30` + guard

da „7-dnevni|7-day" u components/app/messages/content-help = 0 pogodaka), kanarinac u oba smjera. PR bez merge; John vodi merge poslije zelenog CI-ja. P2p prompt: `/tmp/alai/p2p-prompt-900166.md`; evidence: `~/system/evidence/900166/`.

Rezultat (2026-08-24 ~14:55Z)

- PR #401 (pi, commit 5115afab, 11 fajlova) — CI build 1316 zelen (CI Gates izvršen) → merge 7347a9a6.
- PR #402 (spec trial asercija, 8dc0cec9) — validacija 1317 zelena → merge bc77c99a.
- Manual build 1318: svi stageovi zeleni uklj. E2E UAT (prvi zeleni na main danas) → Promote→Demo approved (f2633521) → succeeded 14:50Z.
- ŽIVI DOKAZ (browser, Playwright): app.bilko.cloud/demo?country=HR banner = "Pokreni 30-dnevni trial →", has_30=true, has_7=false, 0 console errors. Screenshot: `/tmp/evidence-900166/browser-screenshots/demo-banner-30d.png`; JSON: `/tmp/evidence-900166/demo-banner-30d-verification.json`.
- Odobrenja i verifikacije: `~/system/evidence/900166/john-approval-verification-20260824.md` + pi evidence u istom diru.

Revision #2
