

MC 900249 — Support split F2 src ekstrakcija + cutover (2026-08-25)

MC #900249 — Support split F2: src ekstrakcija + cutover (2026-08-25)

Status pri startu (BEFORE): F1 isporučen (#900162, peer PASS): repo `Bilko-Support` živ (id `c70b7d8f`), test pod `bilko-web-support-demo-v2` vrti fork sliku `bilko-web-support:demo-1d58cbb6` s `BILKO_APP_SURFACE=support` (az verifikacija 25.08.). Pipeline definition objekat NIJE registrovan (u projektu samo Bilko-CI-CD + rollback rehearsal). `support.bilko.cloud` još servira stari pod (main-repo slika `bilko-web:demo-d01c304e`).

CEO odobrenje: 25.08. ~22:0x — "Da" na pokretanje F2.

Plan: `~/system/evidence/900161/PLAN.md` §F2 (BookStack p3407). Koraci 0-8 preneseni u MC opis (#900249): registracija pipeline definicije, ekstrakcija 8 support fajlova + auth subtree-pin (12) + app-surface/middleware, 6 admin API metoda, 30 testova u novi CI, env ožičenje (runtime, ne build ARG), cutover binding `support.bilko.cloud` → v2 (DNS netaknut), soak 48-72h uz živ stari pod (rollback = repoint nazad).

Granice: main repo se ne dira (F3 čišćenje NIJE u opsegu); stari pod se ne briše; DNS se ne dira.

Izlazni kriterij: `support.bilko.cloud` servira novi pod; 3 PI2 provjere + 30 testova zeleni u novom repou; platformAdmin JWT radi; soak evidentiran; stari pod živ.

Vlasnik: flowforge (F1 presedan; routing alat dao product-support 44% — pogrešan domen za infra posao, odstupanje zabilježeno).

Revision #1
