

Agent Team Topology ADR-024

ADR-024: Agent Team Topology

Date: 2026-05-09 | **Status:** Accepted

Context

Phase D (2026-05-07) converted `~/companies/` to symlink → `~/system/agents/personas/`. Link count = 1 (single inode per file). NOT hardlink mirror.

Decision

Canonical: `~/system/agents/personas/<X>/` (12 agent teams)

Backward-compatible alias: `~/companies/<X>/` (symlink, transparent to all resolvers)

Future target: `~/system/teams/<X>/` (deferred)

Consequences

- Zero refactor needed
- No divergence risk
- Naming semantics (accepted debt)

References

- Decision memo: `~/system/specs/anvil-fs-d2-decision.md` [CEO_APPROVED] 2026-05-09
- Expert briefs: `/tmp/anvil-fs-d2/`
- Canonical registry: `~/system/specs/canonical-registry.md`
