

Architecture — Frontend Route Map

LumisCare Frontend — Complete Route Map

Generated: 2026-04-04 **Source of truth:** `frontend/web/src/routes/index.ts` + `src/components/navigation/sidebar/Sidebar.tsx` **Mobile source:** `mobile/app/src/app/` (Expo Router v4, file-based) **Total registered web routes:** 97 (including aliases and redirects) **Portals covered:** Back Office, Family Portal, Admin Panel, Mobile App

Back Office Routes

Route	Component	Lines	Status	RBAC Guard	Notes
<code>/</code> (index)	<code>DashboardPage</code>	568	Functional	All backoffice roles	Full metrics + rota section
<code>/clients</code>	<code>ClientsPage</code>	131	Functional	Most backoffice roles	Tabbed navigation, delegates to content components
<code>/clients/:id</code>	<code>ClientPage</code>	—	Functional	Most backoffice roles	Client detail page
<code>/assessments</code>	<code>AssessmentsPage</code>	—	Functional	Clinical + admin roles	Assessments overview
<code>/clients/:clientId/assessment/live</code>	<code>LiveAssessmentPage</code>	—	Functional	None (no ProtectedRoute)	Live assessment flow with client context
<code>/clients/assessment/live</code>	<code>LiveAssessmentPage</code>	—	Functional	None	Live assessment flow without client context
<code>/clients/assessment/transcript</code>	<code>AssessmentTranscriptPage</code>	—	Functional	None	Assessment transcript view

Route	Component	Lines	Status	RBAC Guard	Notes
/clients/:clientId/body-map	BodyMapPage	—	Functional	None	Body observations with client context
/clients/body-map	BodyMapPage	—	Functional	None	Body observations without client context
/clients/:clientId/assessment/complete	AssessmentCompletionPage	—	Functional	None	Consent + attendees with client context
/clients/assessment/complete	AssessmentCompletionPage	—	Functional	None	Consent + attendees without client context
/clients/assessment/questions/:sectionId	QuestionsPage	—	Functional	None	Section questions view
/clients/assessment/question-management	QuestionManagementPage	—	Functional	Clinical + admin roles	Drag-and-drop reorder
/clients/:clientId/assessment/question-management	QuestionManagementPage	—	Functional	Clinical + admin roles	Drag-and-drop reorder with client context
/clients/assessment/risk-assessment-risks	RAQuestionsPage	—	Functional	None	Risk assessment questions
/clients/assessment/risk-assessment-risks/:sectionId	RAQuestionsPage	—	Functional	None	Risk assessment questions by section
/clients/assessment/section/:sectionId	PersonalInformationPage	—	Functional	None	Section detail view
/clients/assessment/medication/:medicationId/edit	EditMedicationPage	—	Functional	Clinical + admin roles	Edit medication (QA excluded)
/clients/:clientId/assessment/medications/add	AddMedicationPage	—	Functional	Clinical + admin + carer	Add medication with client context
/clients/assessment/medications/add	AddMedicationPage	—	Functional	Clinical + admin + carer	Add medication without client context
/clients/:clientId/assessment/medications/:medicationId	MedicationDetailsPage	—	Functional	None	Medication details (read-only for QA)

Route	Component	Lines	Status	RBAC Guard	Notes
/clients/:clientId/assessment/medications/:medicationId/edit	EditMedicationPage	—	Functional	Clinical + admin roles	Edit medication with client context
/employees	EmployeePage	753	Functional	None (no ProtectedRoute)	Full employee list
/employees/new	CreateEmployeePage	—	Functional	Manager roles only	Create employee (QA excluded)
/employees/:id	EmployeeDetailsPage	—	Functional	None	Employee detail page
/employees/find-by-skills	FindCarersBySkillsPage	—	Functional	None	Search carers by qualifications
/leaves	LeavesOverviewPage	563	Functional	None	Leave management overview
/leaves/approval	LeaveRequestApprovalPage	—	Functional	Manager + shift-leader roles	Leave request approval (Feature #252)
/hr/training-matrix	TrainingMatrixPage	636	Functional (1 TODO)	HR + manager + admin roles	Training compliance matrix
/hr/dbs	DBSDashboardPage	393	Functional (1 TODO)	HR + manager + admin roles	DBS certificate status
/hr/bradford	BradfordDashboardPage	372	Functional (1 TODO)	HR + manager + admin roles	Bradford Factor scoring
/hr/supervisions	SupervisionSchedulePage	487	Functional (1 TODO)	HR + manager + admin roles	Supervision scheduling
/hr/care-certificate	CareCertificateTrackerPage	450	Functional (1 TODO)	HR + manager + admin roles	Care Certificate tracker
/hr/cqc-pack	CQCInspectionPackPage	554	Functional	HR + manager + admin roles	CQC inspection pack
/visits	VisitPage	—	Functional	None	Visit list and management
/visits/activity-log	ActivityLogPage	—	Functional	None	Visit activity log
/visits/gps-checkin	GPSCheckInSimulationPage	548	Functional	None	GPS geofence test tool (Feature #275)
/visits/evv	EVVPage	111	Functional	None	Electronic Visit Verification / QR check-in (Feature #277)

Route	Component	Lines	Status	RBAC Guard	Notes
/visits/live-tracking	LiveTrackingDashboard	—	Functional	None	Real-time carer location (Feature #287)
/visits/completed-events	CompletedEventsPage	—	Functional	None	Completed visit review before invoicing
/visits/handoff	ShiftHandoffPage	—	Functional	None	SBAR shift handoff notes
/backoffice/scheduling	SchedulingPage	799	Functional (1 TODO)	Coordinator + manager + admin	Full calendar/roster grid
/backoffice/incidents (index)	IncidentsListPage	759	Functional (1 TODO)	None	Incident list
/backoffice/incidents/:id	IncidentDetailPage	2487	Functional	None	Incident detail (investigation tab RBAC-gated inline)
/backoffice/incidents/safeguarding	SafeguardingPage	59	Functional	None	RBAC wrapper — delegates to ClientsSafeguardContent
/care-plans	CarePlansPage	599	Functional (1 TODO)	None	Care plans list
/care-plans/:id	CarePlanReviewPage	864	Functional	Manager + clinical + admin	Care plan approval workflow
/care-plans/:id/edit	CarePlanEditorPage	1768	Partial (53 TODOs)	Manager + clinical + admin	10-section editor — incomplete fields
/care-plans/:id/task-linking	CarePlanTaskLinkingPage	—	Functional	Manager + coordinator + clinical	Task-to-visit-type linking
/care-plans/reviews-due	CarePlansReviewDuePage	480	Functional	Manager + clinical + QA	NICE QS123 compliance reviews
/ai/care-plan-generator	AICarePlanGeneratorPage	582	Functional	Clinical + manager + admin	AI-powered care plan generation
/finance	FinancePage	82	Functional	ModuleProtected Route: finance	Tabbed finance hub
/finance/audit-log	InvoicesAuditLogPage	—	Functional	ModuleProtected Route: finance	Invoice audit trail

Route	Component	Lines	Status	RBAC Guard	Notes
<code>/finance/billing</code>	InsuranceBillingPage	—	Functional	ModuleProtectedRoute: finance	Medicaid/Medicare claim management
<code>/billing</code>	BillingPage	26	Redirect	None	Redirects to <code>/finance/billing</code>
<code>/intake</code>	AddClientPage	—	Functional	Clinical + manager (QA excluded)	New client intake
<code>/smart-upload</code>	SmartUploadPage	—	Functional	Clinical + manager (QA excluded)	AI PDF document extraction
<code>/reports</code>	ReportsPage	283	Functional	None	Report generation UI
<code>/cqc-readiness</code>	CQCReadinessPage	277	Functional	Manager + clinical + QA + regional	KLOE evidence + compliance scoring
<code>/training/compliance</code>	TrainingCompliancePage	306	Functional	Manager + HR + QA + regional	Staff training gap analysis
<code>/profile</code>	ProfilePage	—	Functional	None	User profile (all authenticated users)
<code>/notifications</code>	NotificationsInboxPage	—	Functional	None	Notification feed (all authenticated users)
<code>/settings/notifications</code>	NotificationPreferencesPage	—	Functional	None	Channel preferences (Feature #322)

Back Office Alias / Redirect Routes

Route	Destination	Type	Notes
<code>/dashboard</code>	<code>/</code>	Navigate redirect	Legacy path compatibility
<code>/compliance</code>	<code>/admin/compliance</code>	Navigate redirect	BUG: wrong destination for backoffice users
<code>/incidents</code>	<code>/backoffice/incidents</code>	Navigate redirect	Legacy path compatibility
<code>/schedule</code>	SchedulingPage (rendered directly)	Alias	Renders same component as <code>/backoffice/scheduling</code>
<code>/training-compliance</code>	TrainingCompliancePage (rendered directly)	Alias	Renders same component as <code>/training/compliance</code>
<code>/care-notes</code>	familyCareNotesPage (rendered directly)	Alias	Family portal alias

Route	Destination	Type	Notes
<code>/care-plan</code>	<code>familyCarePlanPage</code> (rendered directly)	Alias	Family portal alias
<code>/invoices</code>	<code>familyInvoicesPage</code> (rendered directly)	Alias	Family portal alias

Family Portal Routes

Route	Component	Lines	Status	RBAC Guard	Notes
<code>/family-portal-dashboard</code>	<code>familyDashboardPage</code>	522	Functional (1 TODO)	family-member + admin roles	Family dashboard
<code>/family-portal-carenotes</code>	<code>CareNotesPage</code>	1272	Functional	family-member + admin roles	Full read view of visit notes
<code>/family-portal-careplan</code>	<code>CarePlanPage</code>	797	Functional (2 TODOs)	family-member + admin roles	Care plan view
<code>/family-portal-invoices</code>	<code>InvoicesPage</code>	2479	Functional (2 TODOs)	family-member + admin roles	Invoices and billing

Alias routes (workaround patches):

Alias Route	Resolves To	Notes
<code>/care-notes</code>	<code>familyCareNotesPage</code>	Shortcut alias
<code>/care-plan</code>	<code>familyCarePlanPage</code>	Shortcut alias
<code>/invoices</code>	<code>familyInvoicesPage</code>	Shortcut alias

Missing family portal features: No messaging/communication between family and carers. No visit scheduling from family side. No emergency contacts view.

Admin Panel Routes

Core Admin Routes

Route	Component	Lines	Status	RBAC Guard	Notes
<code>/admin/organizations</code>	<code>OrganizationsPage</code>	511	Functional (5 TODOs)	system-admin + provider-admin	Organization management

Route	Component	Lines	Status	RBAC Guard	Notes
/admin/users	UsersPage	991	Functional (7 TODOs)	system-admin only	User management
/admin/roles	RolesPage	387	Functional (1 TODO)	system-admin only	Roles and permissions
/admin/settings	SettingsPage	524	Functional	system-admin only	System settings
/admin/audit-logs	AuditLogsPage	514	Functional (1 TODO)	system-admin only	Audit trail
/admin/compliance	ComplianceDashboardPage	555	Functional	system-admin only	HIPAA compliance dashboard
/admin/dscr	DSCRCompliancePage	386	Functional	system-admin + provider-admin	NHS DSCR compliance
/admin/data-import	DataImportPage	—	Functional	system-admin only	CSV/JSON data import
/admin/data-export	DataExportPage	—	Functional	system-admin only	CSV/JSON data export
/admin/multi-tenancy	MultiTenancyTestPage	—	Functional	system-admin only	Organization isolation test
/admin/module-subscriptions	ModuleSubscriptionsPage	—	Functional	system-admin only	Per-org module access (Feature #360)
/admin/questions	QuestionManagementPage	—	Functional	system-admin + provider-admin	Assessment question management (Feature #233)

Admin Test / Diagnostic Pages

These 18 routes are permanent in the router but function as feature verification tools. They should be gated by a dev/debug feature flag in production builds.

Route	Component	Feature #	RBAC Guard	Purpose
/admin/encryption-compliance	EncryptionCompliancePage	#362	system-admin	Encryption at rest verification
/admin/tls-security	TLSecurityTestPage	#363	system-admin	TLS 1.3/1.2 enforcement
/admin/data-residency	DataResidencyPage	#365	system-admin	US data sovereignty
/admin/openapi-validation	OpenAPIValidationPage	#366	system-admin	API spec conformance

Route	Component	Feature #	RBAC Guard	Purpose
/admin/token-enrichment	TokenEnrichmentTestPage	#16	system-admin	JWT token enrichment
/admin/api-auth-test	ApiAuthTestPage	#17	system-admin	Bearer token validation
/admin/api-versioning	APIVersioningTestPage	#367	system-admin	/api/v1/ prefix verification
/admin/api-sort-test	APISortTestPage	#369	system-admin	Sort parameter verification
/admin/request-validation	RequestValidationTestPage	#371	system-admin	Input validation
/admin/cors-test	CORSTestPage	#373	system-admin	CORS header verification
/admin/fk-constraints	ForeignKeyConstraintsTestPage	#374	system-admin	Referential integrity
/admin/check-constraints	CheckConstraintsTestPage	#376	system-admin	Data validation constraints
/admin/push-notification-test	PushNotificationTestPage	#317	system-admin + provider-admin	Azure Notification Hub push
/admin/sms-notification-test	SmsNotificationTestPage	#319	system-admin + provider-admin	Azure Communication Services SMS
/admin/quiet-hours-test	QuietHoursTestPage	#321	system-admin + provider-admin	Critical notification bypass
/admin/channel-routing-test	ChannelRoutingTestPage	#323	system-admin + provider-admin	Channel preference routing
/admin/device-registration-test	DeviceRegistrationTestPage	#325	system-admin + provider-admin	Mobile device token storage
/admin/notification-template-test	NotificationTemplateTestPage	#324	system-admin + provider-admin	Template variable substitution
/admin/delivery-tracking-test	DeliveryTrackingTestPage	#327	system-admin + provider-admin	Notification delivery logging
/admin/notification-retry-test	NotificationRetryTestPage	#328	system-admin + provider-admin	Failed notification retry
/admin/in-app-read-tracking-test	InAppReadTrackingTestPage	#329	system-admin + provider-admin	Read status tracking
/admin/notification-analytics	NotificationAnalyticsPage	#329	system-admin + provider-admin	Delivery statistics dashboard

Admin Sidebar Navigation (from Sidebar.tsx)

The admin sidebar exposes 7 items — only a subset of all admin routes. Test/diagnostic pages are not listed in the sidebar.

Sidebar Label	Route	Allowed Roles
Organizations	<code>/admin/organizations</code>	system-admin + provider-admin
Users	<code>/admin/users</code>	system-admin + provider-admin
Roles & Permissions	<code>/admin/roles</code>	system-admin only
Settings	<code>/admin/settings</code>	system-admin + provider-admin
Audit Logs	<code>/admin/audit-logs</code>	system-admin only
HIPAA Compliance	<code>/admin/compliance</code>	system-admin only
NHS DSCR	<code>/admin/dscr</code>	system-admin + provider-admin

Mobile Screens (Expo Router v4)

File-based routing at `mobile/app/src/app/`. Routes correspond to the filesystem path under `(app)/`.

Screen / File	Lines	Status	Notes
<code>(app)/index.tsx</code> — Home/Schedule	1624	Functional	Large comprehensive carer dashboard
<code>(app)/schedule.tsx</code>	671	Functional	Carer schedule view
<code>(app)/visit/[visitId]/index.tsx</code>	490	Functional	Visit detail hub
<code>(app)/visit/[visitId]/care-note.tsx</code>	46	Functional	Thin wrapper, delegates to CareNoteForm
<code>(app)/visit/[visitId]/emar.tsx</code>	1182	Functional (2 TODOs)	Electronic MAR administration
<code>(app)/visit/[visitId]/vitals.tsx</code>	1087	Needs review (19 TODOs)	Critical: clinically sensitive vitals screen — highest TODO density in codebase
<code>(app)/visit/[visitId]/medications.tsx</code>	122	Functional	Medication list for visit
<code>(app)/visit/[visitId]/task-validation.tsx</code>	295	Functional (1 TODO)	Task validation flow
<code>(app)/visit/[visitId]/signature.tsx</code>	308	Functional (2 TODOs)	Signature capture
<code>(app)/visit/[visitId]/check-out.tsx</code>	5	Functional	Thin delegator to CheckOutView

Screen / File	Lines	Status	Notes
(app)/visit/[visitId]/client-details.tsx	264	Functional	Client info within visit
(app)/visit/[visitId]/structured-note.tsx	—	Present	Structured clinical note entry
(app)/visit/[visitId]/observation.tsx	—	Present	Clinical observations
(app)/visit/[visitId]/pictures.tsx	—	Present	Camera/media capture
(app)/visit/[visitId]/online-assistance.tsx	—	Present	Remote assistance feature
(app)/visit/[visitId]/manual-checkout.tsx	—	Present	Manual override checkout
(app)/visit/[visitId]/upload-progress.tsx	—	Present	Upload status indicator
(app)/assessment/index.tsx	684	Functional (1 TODO)	Mobile assessment flow
(app)/profile/index.tsx	490	Functional	User profile
(app)/profile/availability.tsx	—	Present	Carer availability management
(app)/video-call/[callId]/index.tsx	31	Present	LiveKit WebRTC video call
(app)/voice-commands.tsx	390	Functional	Voice input feature
(app)/notifications/index.tsx	—	Present	Notification feed
(app)/notifications/settings.tsx	—	Present	Notification preferences
(app)/settings.tsx	—	Present	App settings
(app)/dev-tools.tsx	—	Present	Developer tools screen
auth.tsx	—	Present	OAuth callback handler

Navigation Gaps

Menu Item	Sidebar Path	Route Exists?	Content Status	Fix Needed
Dashboard	/	Yes	Functional (568 lines)	None
Notifications	/notifications	Yes	Functional	None
Clients	/clients	Yes	Functional	None
Employees > DBS Status	/hr/dbs	Yes	Functional (1 TODO)	None

Menu Item	Sidebar Path	Route Exists?	Content Status	Fix Needed
Employees > Training Matrix	<code>/hr/training-matrix</code>	Yes	Functional (1 TODO)	None
Employees > Bradford Factor	<code>/hr/bradford</code>	Yes	Functional (1 TODO)	None
Employees > Supervisions	<code>/hr/supervisions</code>	Yes	Functional (1 TODO)	None
Employees > Care Certificate	<code>/hr/care-certificate</code>	Yes	Functional (1 TODO)	None
Employees > CQC Pack	<code>/hr/cqc-pack</code>	Yes	Functional	None
Schedule (parent)	<code>/visits</code>	Yes	Functional	Structural: parent links to <code>/visits</code> but sub-items link to <code>/backoffice/scheduling</code>, <code>/visits/completed-events</code>, <code>/visits/handoff</code> — mixed path hierarchy
Schedule > Rostering	<code>/backoffice/scheduling</code>	Yes	Functional (1 TODO)	None
Schedule > Completed Events	<code>/visits/completed-events</code>	Yes	Functional	None
Schedule > Shift Handoff	<code>/visits/handoff</code>	Yes	Functional	None
Care Plans	<code>/care-plans</code>	Yes	Functional (1 TODO)	None
AI Care Plan	<code>/ai/care-plan-generator</code>	Yes	Functional	None
Assessments	<code>/assessments</code>	Yes	Functional	None
Finance	<code>/finance</code>	Yes	Functional (ModuleProtectedRoute)	None
Incidents	<code>/backoffice/incidents</code> <code>/safeguarding</code>	Yes	Functional (thin wrapper)	Architectural: sidebar links to <code>/safeguarding</code> but incidents list is at <code>/backoffice/incidents</code> — users cannot reach incidents list from sidebar
Reports	<code>/reports</code>	Yes	Functional	None

Menu Item	Sidebar Path	Route Exists?	Content Status	Fix Needed
Compliance (parent)	/compliance	Redirect only	Redirects to /admin/compliance	BUG P1: backoffice sidebar Compliance parent path redirects to HIPAA admin panel, not to backoffice CQC/compliance hub
Compliance > CQC Readiness	/cqc-readiness	Yes	Functional	None
Compliance > Training Compliance	/training/compliance	Yes	Functional	None

Mock Data Pages

Based on audit evidence, the following pages carry `TODO` markers explicitly referencing "connect to real API" or similar — indicating they may be rendering mock/sample data in some sections:

Page	File Location	TODO Count	Nature of Mock
CarePlanEditorPage	features/backOffice/carePlans	53	Many section fields not wired to real API — <code>//</code> <code>TODO: connect to real API</code> patterns throughout
vitals.tsx (mobile)	mobile/app/src/app/(app)/visit/[visitId]/vitals.tsx	19	Clinically sensitive screen with incomplete API wiring
UsersPage	features/admin/users	7	Minor TODOs — some user management operations may fall back
OrganizationsPage	features/admin/organizations	5	Minor TODOs
IncidentsListPage	features/backOffice/incidents/list	1	Single TODO
SchedulingPage	features/backOffice/scheduling	1	Single TODO in 799-line page
CarePlansPage	features/backOffice/carePlans	1	Single TODO
DBSDashboardPage	features/backOffice/hr/pages/DBSDashboardPage	1	Single TODO
TrainingMatrixPage	features/backOffice/hr/pages/TrainingMatrixPage	1	Single TODO
BradfordDashboardPage	features/backOffice/hr/pages/BradfordDashboardPage	1	Single TODO

Page	File Location	TODO Count	Nature of Mock
SupervisionSchedulePage	features/backOffice/hr/pages/SupervisionSchedulePage	1	Single TODO
CareCertificateTrackerPage	features/backOffice/hr/pages/CareCertificateTrackerPage	1	Single TODO
familyPortalDashboardPage	pages/familyPortal/dashboard	1	Minor TODO
CarePlanPage (family)	features/familyPortal/carePlan	2	Minor TODOs
InvoicesPage (family)	features/familyPortal/invoices	2	Minor TODOs
AuditLogsPage	features/admin/auditLogs	1	Minor TODO
RolesPage	features/admin/roles	1	Minor TODO

Note on methodology: TODO counts use literal string grep of "TODO". They include code comments such as `// TODO: connect to real API` and represent technical debt markers, not blank or placeholder UI. No page renders "Coming soon" or empty content.

Stub / Placeholder Pages

No pages are pure stubs rendering blank or "Coming soon" content. All registered pages render substantive UI. The following are below 50 lines but delegate intentionally:

Page	File	Lines	Nature
BillingPage	features/backOffice/billing	26	Intentional redirect wrapper to <code>/finance/billing</code>
SafeguardingPage	features/backOffice/incidents/safeguarding	59	Intentional RBAC wrapper delegating to <code>ClientsSafeguardContent</code>
check-out.tsx (mobile)	(app)/visit/[visitId]/check-out.tsx	5	Intentional thin delegator to <code>CheckOutView</code> component
care-note.tsx (mobile)	(app)/visit/[visitId]/care-note.tsx	46	Intentional thin wrapper for <code>CareNoteForm</code>
video-call/[callId]/index.tsx (mobile)	(app)/video-call/[callId]/index.tsx	31	LiveKit integration, thin entry point

Unrouted Components

The following components exist in the source tree but have no registered route in

`src/routes/index.ts`:

Component	File Path	Concern Level	Notes
<code>SOSHHistoryPage</code>	<code>features/backOffice/dashboard/SOSHHistoryPage.tsx</code> (96 lines)	P1	Referenced in comment as <code>/backoffice/safety/sos-history</code> but route never registered — feature dead end
<code>KeywordPage</code>	<code>features/backOffice/keywords/pages/KeywordPage.tsx</code>	P1	Keyword management feature exists with no route — unreachable
<code>RedFlagDetectionDemoPage</code>	<code>features/backOffice/clients/pages/RedFlagDetectionDemoPage.tsx</code>	P2	Demo/diagnostic page exists but is unrouted

Summary Statistics

Metric	Count
Total registered web routes (including aliases/redirects)	~97
Back Office routes (primary)	56
Back Office alias/redirect routes	8
Family Portal routes (primary)	4
Family Portal alias routes	3
Admin core routes	12
Admin test/diagnostic routes	22
Auth routes (<code>/login</code> , <code>/logout</code> , <code>/access-denied</code>)	3
Catch-all 404 route	1
Mobile screens	27
Pages with TODO markers (web)	17
Unrouted components	3
Navigation gaps (bugs)	2 confirmed

Priority Issues

Priority	Issue	Impact
----------	-------	--------

P0	<code>CarePlanEditorPage</code> (1768 lines, 53 TODOs) — core clinical page, incomplete fields	Clinical product gap
P0	Mobile <code>vitals.tsx</code> (1087 lines, 19 TODOs) — clinically sensitive screen	Clinical product gap
P1	Sidebar <code>/compliance</code> redirects to HIPAA admin page instead of backoffice CQC/compliance hub	Wrong UX for all backoffice users
P1	Sidebar <code>Incidents</code> links to <code>/backoffice/incidents/safeguarding</code> — users cannot reach the incidents list from the sidebar	Navigation dead end
P1	<code>SOSHHistoryPage</code> component exists (96 lines) but has no registered route	Feature dead end
P1	<code>KeywordPage</code> component exists but is not routed	Unreachable feature
P2	Family portal URLs (<code>/family-portal-dashboard</code> etc.) violate URL hierarchy — alias patches mask the structural problem	UX and URL semantics debt
P2	<code>RedFlagDetectionDemoPage</code> exists but is unrouted	Dead code
P2	<code>switch.tsx</code> file and <code>switch/</code> folder coexist in <code>src/components/ui/</code> — import resolution ambiguity	Build risk
P2	<code>calender</code> folder typo in <code>src/components/ui/</code>	DX friction, propagates through all calendar imports
P3	22 admin test/diagnostic pages as permanent routes — should be gated by dev/debug feature flag	Security surface area in production, route tree clutter
P3	<code>SafeguardingPage</code> (59 lines) delegates to <code>ClientsSafeguardContent</code> — component lives in Clients feature, not Incidents	Architectural boundary violation

Revision #2

Created 2026-04-05 21:40:50 UTC by John

Updated 2026-05-31 20:05:34 UTC by John
