

Fix Backlog — P0/P1/P2 Issues

LumisCare — Fix Backlog

Consolidated from 5 expert reports — 2026-03-25 Total issues: 32

Format: [PORTAL] [PAGE] [ELEMENT] [PROBLEM] [FIX NEEDED]

P0 — Demo Blocking

Issues that will be visible within 60 seconds of any stakeholder opening the app. Must be fixed before any demo or investor showing.

#	Portal	Page	Element	Problem	Fix Needed
1	Admin Panel	Organizations (/admin/organizations)	"Add Organization" button	Button renders; no form or modal wired	Wire button to create organization form/modal with: Organization Name, Status, Contact details → POST /api/v1/organizations
2	Admin Panel	Organizations (/admin/organizations)	Per-card "More options" (...) button	Button renders; no dropdown or menu attached	Add dropdown menu with actions (Edit, View, Deactivate) per org card
3	Family Portal	Care Plan (/family-portal-careplan)	Print button (header)	onClick handler missing — button does nothing	Wire to window.print() or PDF export
4	Family Portal	Care Plan (/family-portal-careplan)	More options (3-dot) button (header)	onClick handler missing — button does nothing	Add dropdown with relevant actions (Download, Share) or remove button

#	Portal	Page	Element	Problem	Fix Needed
5	Family Portal	Care Notes (<code>/family-portal-carenotes</code>)	"Week" button (rounded-full with left chevron)	No <code>onClick</code> handler — looks interactive but does nothing	Wire to <code>goToPreviousWeek()</code> (same as the arrow button) or replace with correct UI
6	Family Portal	Care Plan (<code>/family-portal-careplan</code>)	Draw Signature area inside Sign & Consent Modal	Draw tab shows placeholder <code><div></code> , no canvas or drawing library hooked up	Integrate a canvas drawing library (e.g. <code>react-signature-canvas</code>) — draw mode must capture a real signature
7	Back Office	Body Map (<code>/clients/:id/body-map</code>)	"This Week" time filter button	No <code>onClick</code> handler wired	Wire to filter observations by current week, or remove button until implemented
8	Back Office	Body Map (<code>/clients/:id/body-map</code>)	"Filters" button	No <code>onClick</code> handler wired	Open filter drawer/modal for observation category/severity, or remove button until implemented
9	Back Office	Body Map (<code>/clients/:id/body-map</code>)	Zoom controls (minus / zoom icon / plus)	UI renders; no zoom logic implemented	Implement zoom state and apply CSS transform on body diagram container
10	Back Office	Body Map (<code>/clients/:id/body-map</code>)	Per observation card "Edit" (pencil icon)	<code>onEdit(id)</code> handler marked TODO — not implemented	Implement edit observation flow (open edit dialog pre-populated with observation data)
11	Family Portal	Invoices (<code>/family-portal-invoices</code>)	Per-row "Pay" button	Calls <code>console.log</code> or shows "Online payment will be available in the next release." toast; no payment flow	For demo: show a modal stub. For production: integrate payment provider. Disable with clear "Coming Soon" state if not ready.

#	Portal	Page	Element	Problem	Fix Needed
12	Family Portal	Dashboard (<code>/family-portal-dashboard</code>)	Per-invoice "Pay" button	Same as above — triggers info toast only	Same fix as above
13	Back Office	Visits Header (<code>/visits</code>)	Print button	<code>console.log</code> placeholder — "Print functionality coming soon"	Wire to print or remove button
14	Back Office	Visits Header (<code>/visits</code>)	Export button	<code>console.log</code> placeholder — "Export functionality coming soon"	Wire to CSV/PDF export or remove button
15	Back Office	Activity Log (<code>/visits/activity-log</code>)	Print button	No <code>onClick</code> handler wired	Wire to print or remove button
16	Back Office	Activity Log (<code>/visits/activity-log</code>)	Export button	No <code>onClick</code> handler wired	Wire to export (CSV at minimum) or remove button
17	Family Portal	Dashboard	Video thumbnails in visit cards	Play icon overlay shown on thumbnails but no <code>onClick</code> handler — non-interactive	Either remove play overlay or implement video playback modal

P1 — Pilot Blocking

Issues that block a paying pilot customer from using core workflows. Must be resolved before any live pilot.

#	Portal	Page	Element	Problem	Fix Needed
18	Admin Panel	Audit Logs (<code>/admin/audit-logs</code>)	Export functionality	No export button present anywhere on the page	Add export button → generate CSV/PDF of audit log entries with current filters applied
19	Admin Panel	Audit Logs (<code>/admin/audit-logs</code>)	Date range filter	No date range picker present — only type filter and text search	Add date range picker (start/end) to filter audit log by date

#	Portal	Page	Element	Problem	Fix Needed
20	Admin Panel	Compliance Dashboard (<code>/admin/compliance</code>)	All action items	Page is fully read-only — data rights requests, anomaly alerts, consent override all require action	Add action controls: respond to data rights requests, acknowledge anomaly alerts, manage consent
21	Family Portal	Profile (<code>/profile</code>)	Edit contact information	Profile page is fully read-only — no edit buttons, no form, no save	Add edit form for at minimum: phone number, preferred contact method. Name/email via Azure AD.
22	Admin Panel	Organizations (<code>/admin/organizations</code>)	Organization data	All data is hardcoded array in component state — not API-connected	Connect to <code>/api/v1/organizations</code> GET (list) and POST (create) endpoints
23	Admin Panel	Roles & Permissions (<code>/admin/roles</code>)	Role management	Roles page is view-only — no "Add Role" or "Edit Role" UI	Add ability to create custom roles and edit permissions, or document that this is intentionally RBAC-fixed
24	Back Office	Activity Log (<code>/visits/activity-log</code>)	"This Month" date filter button	Button renders with dropdown chevron but no <code>onClick</code> handler wired	Wire to date range picker — currently filters are impossible to apply by date on this page
25	Back Office	Completed Events Tab (<code>/visits</code> — Completed Events)	Date Range button	Visual button with no date picker wired	Wire to date range picker for filtering completed events by date range
26	Back Office	Finance	Billing Page	Entire page is placeholder: <code><div>Welcome to BillingPage</div></code>	Implement billing page or redirect to Insurance Billing page until ready
27	Back Office	Scheduling	Recompute Schedule	Demo-only — hardcoded with <code>carer-1 / "Sarah Mitchell"</code> data	Connect to real scheduling data and real recomputation logic

P2 — Production Blocking

Issues that are acceptable for demo/pilot but must be resolved before production launch. Real persistence and real backend required.

#	Portal	Page	Element	Problem	Fix Needed
28	Admin Panel	Settings (all tabs)	Save Changes	Persists to <code>localStorage</code> only	Connect to backend settings API with proper per-org persistence
29	Admin Panel	Assessment Questions	Save Question	Persists to <code>localStorage('admin_assessment_questions')</code>	Connect to backend questions API
30	Admin Panel	Profile	Save Photo	Stores base64 in <code>localStorage</code>	Upload to blob storage; store reference in user record
31	Back Office	Body Map	Add Observation	Saves to <code>localStorage('lumiscare-body-map-observations-{clientId}')</code>	Persist observations to assessment service / clinical records
32	Back Office	Care Plan Review	Schedule Review	Saves to <code>localStorage('lumiscare_scheduled_care_plan_reviews')</code> and <code>localStorage('lumiscare_schedule_blocks')</code>	Persist to scheduling service; create real calendar entries

Summary by Portal

Portal	P0	P1	P2	Total
Back Office (Clinical/Scheduling/Finance/HR)	8	4	3	15
Admin Panel	2	6	3	11
Family Portal	7	1	0	8
Total	17	11	6	32

Quick Wins (P0 items fixable in < 1 hour each)

These P0 bugs are simple missing handler wires — not missing features:

1. **[P0-3]** Family Portal Care Plan Print button — `onClick={() => window.print()}`
2. **[P0-4]** Family Portal Care Plan More options button — add dropdown or remove icon
3. **[P0-5]** Family Portal Care Notes "Week" button — `onClick={goToPreviousWeek}`
4. **[P0-13]** Backoffice Visits Print button — `onClick={() => window.print()}`
5. **[P0-15]** Activity Log Print button — `onClick={() => window.print()}`
6. **[P0-7]** Body Map "This Week" button — remove or stub with toast "Filters coming soon"
7. **[P0-8]** Body Map "Filters" button — remove or stub with toast "Filters coming soon"
8. **[P0-17]** Dashboard video thumbnails — remove play icon overlay until implemented
