

MC #106767 — LightRAG Azure VM deallocation (2026-08-08)

MC #106767 — vm-alai-lightrag DEALLOCATED

Datum: 2026-08-08 ~00:10 (CEO izvrsio), verifikovano 00:1x + nezavisni witness 13:14.

Sta je uradjeno

- Azure VM `vm-alai-lightrag` (RG-ALAI-LIGHTRAG) **deallocated** — reverzibilno; OS disk + data-docker disk u stanju **Reserved** (nisu obrisani; brisanje = posebna CEO odluka).
- Lokalni LightRAG stack (Makinja/ANVIL, `~/system/lightrag-local`, `docker-compose.local.yml`) zdrav i nezavisan: health 200, `llm_binding_host=host.docker.internal:11434`.
- Migracioni backup `~/backups/lightrag-migration-106747/` (1.5G, 4 fajla) netaknut — sada eligible za brisanje po CEO potvrdi.

Dokazi

- Witness transkript (nezavisni agent, Verdict: PASS): `~/system/evidence/106747/witness-transcript-106767-20260808.md`
- Verdict JSON: `~/system/evidence/106747/verdict-106767.json`
- Rekonstruisana evidencija (original obrisani nepoznatim procesom — incident MC #106983): `~/system/evidence/106747/vm-deallocate-2026-08-08-RECONSTRUCTED.md`

Rollback

`az vm start -g RG-ALAI-LIGHTRAG -n vm-alai-lightrag` (diskovi Reserved). DNS/tunel vec preusmjereni na lokalni stack od 03.08 (MC #106747).
