

Deploy Runbook

Deploy Runbook

Prerequisites

- Access to repository: `~/projects/snowit-site`
- Vercel CLI installed: `npm i -g vercel`
- Authenticated: `vercel login`

Deployment Steps

1. **Navigate to repo:** `cd ~/projects/snowit-site`
2. **Pull latest:** `git pull origin main`
3. **Deploy:** `GitHub Pages deploy`
4. **Verify:** Check snowit.ba

Rollback Procedure

1. **List deployments:** `vercel ls N/A (GitHub Pages)`
2. **Identify previous stable deployment ID**
3. **Rollback:** `vercel rollback [deployment-url]`

Common Issues

To be documented as issues are discovered
