

QA Review — SnowIT MC #9257 CTA Prefill (MC #9267)

QA Review #9267 — SnowIT MC #9257

Scope: completed task #9257, "Vizu: snowit.ba followup — usluge.html pricing CTAs mobile mailto + minor cleanup".

Verdict: PASS for the current local repo and live site.

Important historical note: the original #9257 commit (`2840b9e`) used `index.html#contact?plan=<id>`, which does not populate `window.location.search`. That defect matches the MC blocked reason. The current repo/live site use the corrected order `index.html?plan=<id>#contact` for the remaining current SnowIT CTAs; git history shows hotfix `b6e6055` for this URL order.

Evidence

- Verification JSON: `/Users/makinja/system/evidence/qa-9267-snowit-9257-20260728/report.json`
- Verifier script: `/Users/makinja/system/evidence/qa-9267-snowit-9257-20260728/verify_snowit_9257.py`

Commands run

```
node ~/system/tools/discover.js "QA review #9257 snowit.ba usluge.html pricing CTAs mobile
mailto cleanup"
node ~/system/tools/mc.js show 9257
node ~/system/tools/mc.js show 9267
cd /Users/makinja/tenants/SnowIT-BA/web/snowit-site && git show --stat --oneline 2840b9e
cd /Users/makinja/tenants/SnowIT-BA/web/snowit-site && git show --stat --oneline b6e6055
EVIDENCE_DIR=/Users/makinja/system/evidence/qa-9267-snowit-9257-20260728 python3
/Users/makinja/system/evidence/qa-9267-snowit-9257-20260728/verify_snowit_9257.py
```

Checks passed

- Local `usluge.html` has plan-prefill CTA links for the currently visible SnowIT plan CTAs.
- Local plan links use `?plan=` before `#contact`; no `#contact?plan=` broken order remains.
- Local current CTA plan IDs are unique.
- Local CTA classes/data-contact links do not use `mailto:`.
- Old `CONTACT_EMAIL` / `window.location.href=mailto:` JS handler is absent.
- `index.html` contains `planMessages` entries for all current `usluge.html` plan IDs.
- `index.html` reads `window.location.search` with `URLSearchParams`.
- `index.html` nav logo href is `/`.
- Live `https://snowit.ba/usluge.html` returns HTTP 200 and has no broken `#contact?plan=` order.
- Live `https://snowit.ba/index.html?plan=digital-presence` returns HTTP 200 and includes prefill JS.
- Playwright mobile local click-through verified each current plan CTA pre-fills the contact textarea.
- Playwright mobile live direct plan URL verified textarea prefill for `digital-presence`.

Caveats

- Current SnowIT site has changed since April: the original AI CTAs from #9257 are no longer present on current `usluge.html` after later SMB cleanup. Review therefore validates the current extant CTAs plus git history for the original fix/hotfix.
- Existing repo worktree is dirty with unrelated files; this QA review did not modify SnowIT project files.
