

MC 101652 Validation — ALAI 4-Team Restructure Sweep

MC #101652 Validation Report

Generated: 2026-05-21T11:04:54Z

Lane verdicts

- P0 cost reduction measured: PARTIAL — cost-tracker ran, but no baseline artifact was available; no reduction percentage claimed.
- P1 pi-orch/FORGE dispatch: PARTIAL — fleet/spawn-gate evidence exists for #101652, but #101640/#101641/#101642 are still blocked/review-blocked.
- P2 LighTRAG honesty: PARTIAL — config is Azure direct; status OK but graph count is zero and hybrid query failed in this run.
- P3 cleanup complete: BLOCKED — cleanup tasks #101647-#101651 remain open unless shown otherwise in cleanup-state.json.

Recommendation

MC #101652 validation itself can be submitted as complete with a PARTIAL/BLOCKED finding. Do not close the overall restructure sweep as globally complete until blockers in #101640/#101641/#101642 and open P3 cleanup tasks are resolved or explicitly rescoped.

Evidence files

- cost-measurement.json
- dispatch-validation.json
- lightrag-honesty.json
- cleanup-state.json
- verdict.json
- /tmp/bash-output-101652-direct-probe.txt

Verdict JSON summary

- Overall verdict: PARTIAL
- Evidence JSON: `/tmp/101652-validation/verdict.json`
- Validation directory: `/tmp/101652-validation/`
- Direct probe: `/tmp/bash-output-101652-direct-probe.txt`

Review posture

This page documents the validation lane output only. It does **not** claim the full restructure sweep is globally complete. The validation finding is PARTIAL/BLOCKED until upstream task blockers and P3 cleanup tasks are resolved or explicitly rescoped.

Revision #2
