Gap Analysis & 2026-05-14 Ops

Web Portals & Email — Gap Analysis & 2026-05-14 Ops

Source: MC #100609 (parent audit) + verifier-confirmed evidence + CEO decisions log 2026-05-14

Ops execution: MC #100619 (DONE, 5/5 PASS), MC #100618 (PARTIAL — ops 2-3 BLOCKED)

Executive Summary

ALAI controls **15 registered domains** across product lines (Bilko, SnowIT, Drop, Tok), spanning Serbia, Croatia, Bosnia, Norway, and global markets. Audit MC #100609 identified:

- **Cloudflare Access login walls** blocking public www.alai.no + www.basicconsulting.no (FIXED 2026-05-14)
- **Split-brain email risk:** 5 domains retained stale one.com MX fallback records after Migadu migration (FIXED 2026-05-14)
- **Missing DMARC quarantine protection** on 5 production email domains (FIXED 2026-05-14)
- **3 orphaned domains** requiring cleanup or sunset (1 DONE, 2 BLOCKED on external DNS creds)

Post-ops status (2026-05-14): 8/8 domains on Migadu Standard plan (verified); 6/8 DMARC p=quarantine active; CF Access removed from www subdomains; one.com MX cleaned up on all domains. Two external partner domains (merdzanovic.ba, freemyev.com) blocked pending DNS provider access.

Domain Inventory — LIVE / PLACEHOLDER / BROKEN / MISSING

Production Domains (8 active email + web)

Domain	Status	Primary Use	CF Zone	Migadu Email	DMARC
alai.no	LIVE	Holding company, system infra (docs/vault/mc/boards)	YES	YES	p=quarantine
basicconsulting.no	LIVE	Historical brand domain (ALAI Holding AS legal name was Basic AS until 2026-05-07)	YES	YES	p=quarantine
basicfakta.no	LIVE	Historical client portal (parked)	TBD	YES	p=quarantine
bilko.io	LIVE	Bilko Serbia market (canonical)	YES	YES	p=quarantine
bilko.cloud	LIVE	Bilko Croatia market (canonical, NOT bilko.hr)	TBD	YES (added 2026-05-14)	TBD
bilko.company	LIVE	Bilko Bosnia market (canonical, NOT bilko.ba)	TBD	YES (added 2026-05-14)	TBD
snowit.ba	LIVE	SnowIT SMB market	YES	YES	p=quarantine (pre-existing)
enterprise.snowit.ba	LIVE	SnowIT Enterprise brand split (Vercel CNAME only, no email)	NO (CNAME)	NO	n/a
getdrop.no	LIVE	Drop fintech (canonical, NOT drop.no which is TV2 Norway)	TBD	YES	p=quarantine
tokapi.io	LIVE	Tok API infrastructure	YES	TBD	TBD

Partner / Legacy Domains (cleanup pending)

Domain	Status	Owner	Action
merdzanovic.ba	BROKEN (404)	Enis Merdžanović (SnowIT partner, globaldns.com)	BLOCKED — awaiting DNS access (MC #100618 op2)

Domain	Status	Owner	Action
freemyev.com	PLACEHOLDER (405)	ALAI (GoDaddy, creds unknown)	BLOCKED — NULL-MX sunset pending (MC #100618 op3)
vivacareusa.com/.net/.org	DELETED	ALAI (superseded by LumisCare)	DONE — file tree deleted 2026-05-14 (MC #100618 op1)

Bilko Market Domain Mapping (CEO 2026-05-14 Clarification)

CEO confirmed canonical domains per market. Do NOT pursue bilko.hr (unrelated Croatian firm, expires 2026-12-14). Do NOT pursue bilko.rs/.ba/.no (unregistered; deferred decision on brand protection).

Market	Canonical Domain	Owned	Notes
Serbia	bilko.io	YES	NOT bilko.rs (unregistered, MC #100124)
Croatia (HR)	bilko.cloud	YES	NOT bilko.hr (BILKO d.o.o. Zagreb, unrelated firm, expires 2026-12-14)
Bosnia (BiH)	bilko.company	YES	NOT bilko.ba (unregistered)
Norway	none	NO	bilko.no unregistered (brand protection gap, deferred decision)

Email Infrastructure (Migadu)

Configuration

- **Provider:** Migadu (<https://admin.migadu.com>)
- **Credentials:** Bitwarden — search "migadu"
- **Plan:** Standard (unlimited domains, verified by Proveo MC #100619)
- **Active domains:** 8 (alai.no, basicconsulting.no, basicfakta.no, bilko.io, snowit.ba, getdrop.no, bilko.cloud, bilko.company)
- **MX format:** 10 aspmx1.migadu.com / 20 aspmx2.migadu.com

2026-05-14 Cleanup — Stale one.com MX Removal

MC #100619 op2 removed 5 legacy one.com MX records (split-brain risk — if Migadu failed, mail would silently reroute to dead one.com inbox).

Domain	Removed Records	Verification
alai.no	100 c74jebhf4.mx.service.one.	PASS — dig +short MX alai.no returns only Migadu (2 records)
basicconsulting.no	4× 100 mx[1-4].pub.mailpod11-cph3.one.com.	PASS — dig +short MX basicconsulting.no returns only Migadu (2 records)

DMARC Policy Upgrade — p=quarantine

MC #100619 op4 upgraded 5 domains from p=none to p=quarantine pct=100 (reject suspicious mail at DMARC layer, not just SPF/DKIM).

Domain	Before	After	Verification
alai.no	p=none	p=quarantine	PASS — dig +short TXT _dmarc.alai.no returns v=DMARC1; p=quarantine; pct=100
basicconsulting.no	p=none	p=quarantine	PASS
basicfakta.no	p=none	p=quarantine	PASS
bilko.io	p=none	p=quarantine	PASS
getdrop.no	p=none	p=quarantine	PASS
snowit.ba	p=quarantine	(no change)	n/a — already compliant
bilko.cloud	TBD	TBD	Pending — added to Migadu 2026-05-14, DMARC not yet configured
bilko.company	TBD	TBD	Pending — added to Migadu 2026-05-14, DMARC not yet configured

Cloudflare Access Status (post 2026-05-14)

Issue (MC #100609 Claim A — CONFIRMED HIGH by verifier)

www.alai.no and www.basicconsulting.no returned HTTP 302 redirect to cloudflareaccess.com login wall instead of landing pages. Public visitors saw auth gate.

Fix (MC #100619 op1)

Applied CF Access bypass policies to both www apps. Post-fix curl verification:

- **www.alai.no:** HTTP/2 522 (origin connection timeout — no 302 to cloudflareaccess.com)
- **www.basicconsulting.no:** HTTP/2 404 (Vercel DEPLOYMENT_NOT_FOUND — no 302 to cloudflareaccess.com)

Acceptance criterion: PASS — neither domain returns 302 to cloudflareaccess.com. 522/404 are origin configuration errors (separate issue, MC opened for redirect/origin path decision).

Known Issue (post-fix)

www subdomain origins return 522 (alai.no) or 404 (basicconsulting.no) instead of canonical redirect to apex or landing page. Separate MC opened; root cause = missing origin configuration in CF Pages or manual redirect rule needed.

Park / Sunset Decisions (CEO 2026-05-14)

Domain	Decision	Status	Notes
alaione.no (Lobby product)	PARK	NXDOMAIN — no action needed	Product inactive, never re-registered after expiry
fontelepays.com (Lobby)	PARK	NXDOMAIN — no action needed	Product inactive
rendrom.no (legacy)	PARK	NXDOMAIN — no action needed	Unknown origin, never registered by ALAI
gotiva.* (placeholder)	PARK	NXDOMAIN — no action needed	Name collision with gotiva.ba (video studio, unrelated)

Domain	Decision	Status	Notes
freemyev.com	NULL-MX SUNSET	BLOCKED — GoDaddy creds needed	RFC 7505 NULL MX (0 .) + DMARC p=reject + SPF v=spf1 -all. Current: HTTP 405, AWS backend. MC #100618 op3 documented DNS changes.
vivacareusa (.com/.net/.org)	DELETE	DONE — MC #100618 op1	File tree deleted ~/clients-external/vivacareusa/ (backup ~/backups/vivacareusa-final-20260514.tar.gz). Domain ownership TBD.
merdzanovic.ba	RECONNECT CF Pages	BLOCKED — Enis DNS access	Partner domain (Enis Merdžanović, SnowIT). CF Pages project live (51deeb8e.merdzanovic-ba.pages.dev HTTP 200), custom domain failed DNS verification. Current DNS = Vercel (404 DEPLOYMENT_NOT_FOUND) . MC #100618 op2 documented DNS changes for globaldns.com.

Squat Watchlist (defer purchase, monitor expiry)

Domain	Current Owner	Expires	Decision
plock.se	NEware AB (fruits.co marketplace, EUR 16k asking price)	2026-12-06	Defer — monitor for drop, not worth EUR 16k floor
bilko.hr	BILKO d.o.o. Zagreb (Ulica Grada Vukovara 246, legitimate Croatian firm)	2026-12-14	Do NOT pursue — unrelated business, bilko.cloud is canonical for HR market
drop.no	TV2 Norway (major broadcaster)	n/a	Not ALAI — we use getdrop.no
drop.app	Google (Charleston Road Registry, .app TLD operator)	n/a	Unobtainable — .app TLD controlled by Google
tok.no	transportbransjen.no (NEware AB)	2026-12-06	Cannot acquire imminently — we use tokapi.io

Pending CEO Action

1. **Enis Merdžanović coordination (merdžanovic.ba):** Provide globaldns.com panel access OR approve CF DNS transfer. Instructions documented in MC #100618 op2 evidence (~/system/evidence/100618-op2-dns-instructions.txt).
 2. **GoDaddy credentials (freemyev.com):** Locate account access OR approve CF domain transfer. Instructions documented in MC #100618 op3 evidence (~/system/evidence/100618-op3-dns-instructions.txt).
 3. **www.alai.no + www.basicconsulting.no origin path decision:** Separate MC opened (FlowForge queue). Options: (a) 301 redirect www → apex, (b) deploy static landing page to www origin, (c) configure CF Pages www custom domain.
